Md Riyazuddin

Software Engineer

ddinriyazu810@gmail.com — 8224984611 — linkedin.com/in/riyazuddin-28a5a329 — github.com/Riyaz-code1718

PROFILE SUMMARY

Aspiring Software Engineer with a strong foundation in JavaScript, React.js, HTML5, CSS3, TypeScript, Node.js, REST APIs, MongoDB, and Python. Skilled in building responsive and interactive web applications using component-based architecture, state management, CRUD operations, API integration, and asynchronous programming. Currently strengthening backend development, Python, and software engineering fundamentals through hands-on projects.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), React.js, TypeScript, Python (Learning),SQL
- **Frontend:** React.js, Tailwind CSS, Node.js
- **Backend:** Node.js, Express.js, RESTful API Design, Integration, CRUD Operations, Async/Await, Error Handling
- **Database:** MongoDB, Local Storage
- **Tools & Platforms:** Git, GitHub, VS Code, Vercel/Netlify (deployment)
- **Core Concepts:** DOM Manipulation, Event Handling, REST API Integration, Responsive Design, CRUD Operations

PROJECTS

Job Application Tracker React.js, JavaScript, HTML5, CSS3, LocalStorage — GitHub

- Developed a responsive job application tracking web app to manage and organize applications in one place.
- Implemented full CRUD functionality to add, update, view, and delete job application records.
- Added application status tracking (Applied, Interview, Selected, Rejected) with visual indicators.
- Built search and filtering functionality to quickly find applications by company, role, or status.
- Used LocalStorage to persist data across browser sessions and designed a dashboard showing application statistics.

Weather Forecast App React.js, JavaScript, OpenWeather API, CSS3 — GitHub

- Built a real-time weather application that fetches live data using the OpenWeather REST API.
- Implemented city-based search with dynamic rendering of temperature, humidity, and forecast conditions.
- Handled asynchronous API calls with async/await and managed loading and error states for a smooth user experience.
- Designed a fully responsive UI with CSS3, ensuring consistent experience across mobile and desktop.

E-Commerce Product & Cart UI React.js, Tailwind CSS, JavaScript — GitHub

- Developed a multi-page e-commerce interface with product listing, product details, and shopping cart pages.
- Implemented add-to-cart, quantity update, and remove-from-cart functionality using React state management.
- Used React Router for client-side navigation between Home, Product, and Cart pages.
- Styled the entire application with Tailwind CSS for a clean, modern, and fully responsive layout.

EDUCATION

Bachelor of Technology — Computer Science
Takshshila Institute of Engineering & Technology
